

# Hunt, Detect, Protect: Essentials

Because a business relies on its assets, having a monitoring and alerting system helps protect your IT environment by keeping you in a proactive position to respond to each potential risk before a vulnerability becomes an issue. We can help you get in place an essential set of proactive cybersecurity and compliance entitlements for up to 25 IP addresses.

The Threat Landscape is Growing

Solution: Proactive Cyber Strategies

## Proactive, Managed Security

Our managed security provides 24/7 monitoring with management and review. Our security analysts provide actionable insights to improve your security posture, with rapid response identification and reaction to cyber threats.

## Why You Need an Integrated, Ongoing Cybersecurity Program

- ▶ Cyber-attacks are on the rise; particularly among small- and mid-sized businesses.
- ▶ Data and information systems are accessed through internal networks and wireless devices. Monitoring activities and vulnerabilities can protect against unwarranted events or behaviors.

## Risk Mitigation Platform - Essentials

Essential Set of Risk Mitigation Entitlements for Up To 25 IP Addresses

### Asset Discovery & Management

We work with you to validate & track your assets.

- ▶ Discovery of All Assets in the Environment
- ▶ 24/7 Maintenance of Asset List
- ▶ One Asset Inventory Report Per Month

### Remote Monitoring & Alerting

We track and analyze behaviors, patterns and security trends on your network, then alert when needed to keep your network safe.

- ▶ 24/7 x 365 Remote Monitoring & Alerting
- ▶ One Report per Month of Logs, Events & Alerts
- ▶ Up to 25 Critical Devices

### Vulnerability Scans

We conduct regular vulnerability scans and make recommendations based on analysis of the reports.

- ▶ One Vulnerability Scan per Month
- ▶ One Report with set of Recommendations per Month
- ▶ Up to 25 Critical Devices

### Policy Creation or Revision

We work with you to determine what kinds of policies you need and get them produced.

- ▶ Up to One Custom IT Policy Creation or Revision of Existing Policy per Year
